

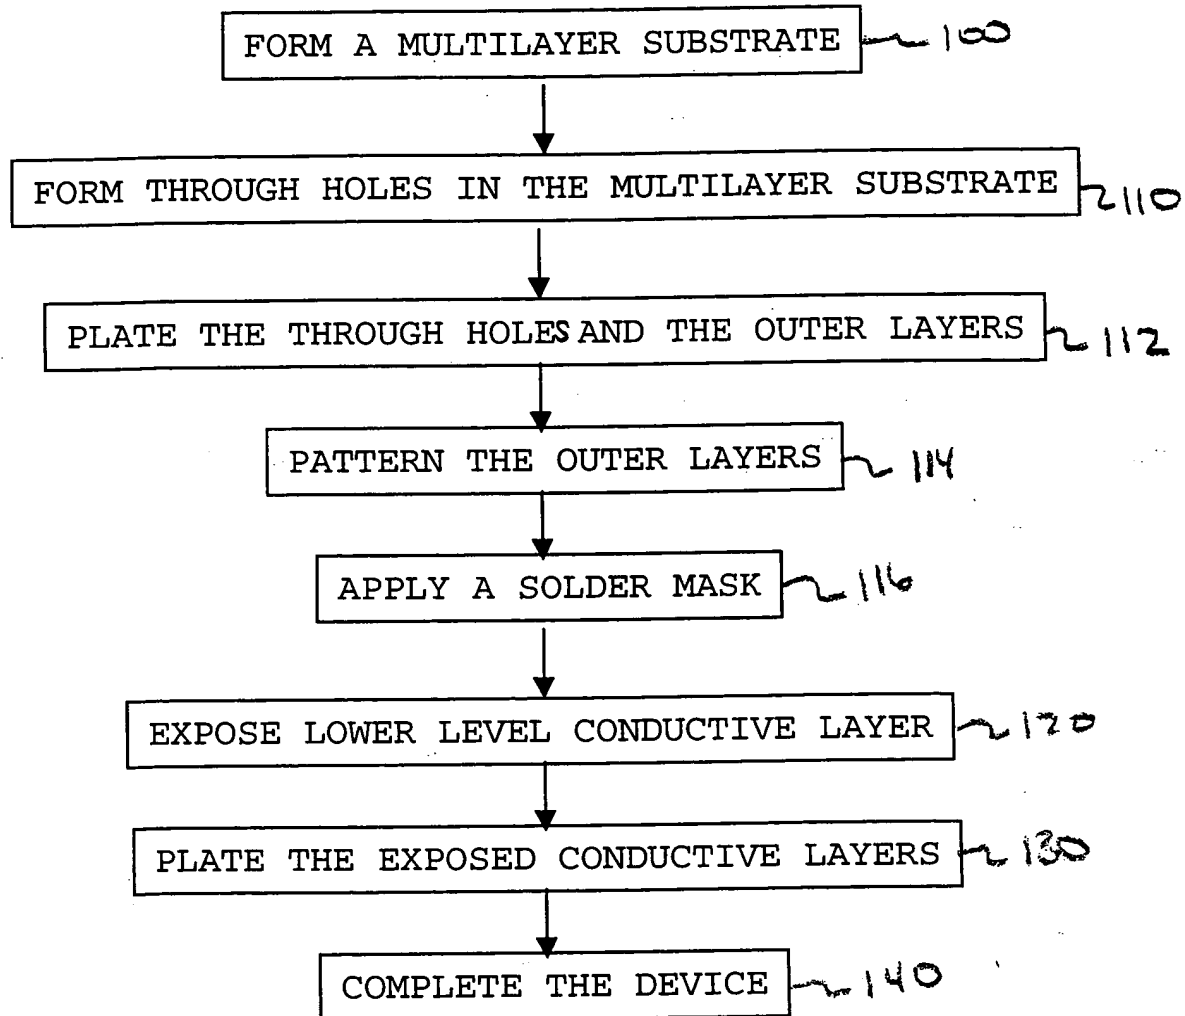

Fig. 1

A cross-sectional view of a multi-layered structure 10. The structure consists of a central core 12, which is flanked by two layers 20 and 22. The core 12 is further divided into two sub-layers 30 and 32. The entire structure is enclosed within a protective layer 14. The layers 20 and 22 are shown with diagonal hatching, while the core 12 and its sub-layers 30 and 32 are shown with a solid white fill. The protective layer 14 is shown with a dashed line.

A cross-sectional view of a multi-layered structure. The structure consists of several horizontal layers. The top layer is labeled 46. Below it is a layer labeled 32. The next layer is labeled 22. Below that is a layer labeled 30. The next layer is labeled 20. Below that is a layer labeled 34. The next layer is labeled 24. The bottom layer is labeled 48. The structure is divided into three main sections by vertical lines. The leftmost section is labeled 36. The middle section is labeled 22. The rightmost section is labeled 30. The structure is shown in a perspective view, with the layers appearing to be stacked on top of each other.
